This homework is for part 2 of the lab2 and part 1 of lab 3 :D

Design the following interface:

When user clicks on he should be transferred to the following interface:
After the user fills the data and clicks (Done) you should go back to the main interface and display the data on the result TextView.

Now: for the button Config., it should move you to this interface:

Same idea, when you click ok this activity should go away and the data should be displayed on the result TextView.

** The TextView should be cleared by clicking on it!

"Go to Implicit Intents" Button should move us to an interface described in Labwork1 in Lab3.
