This homework is for part 1 of the lab2

Homework

Design the interface shown and implement the described functionality below:

The interface has two buttons:

- **Enroll**

When this button is clicked a **Toast** message should be displayed with the string:
"Welcome name in the class of subject" if the check box is not checked otherwise should display:
"Welcome name in the class of subject, Please go to the international students office".

- **Clear Screen**

Clicking this button will simply clear the EditTexts and the CheckBox.

**Toast Message**: This is a simple message that is shown to user as shown:

Its code:

```java
Toast.makeText(getBaseContext(), "This is a Toast Message !!", Toast.LENGTH_LONG).show();
```
